Application rate for the Menards Premium fertilizer is 3.4Lbs per 1,000 sq ft. Always calibrate spreader prior to use. Variations in physical characteristics of material applied, walking speed, condition of spreader, and surface roughness may require different spreader settings. Do not over apply fertilizer. Never apply fertilizer by hand. It must be spread evenly over the application area at the recommended rate. Settings listed are approximate settings only. Your setting may vary.

## DROP SPREADERS

Spreader Not Listed - Setting Tip: Set spreader at 1/4 to 1/3 of the dial as a starting point. This is just a guide always calibrate spreader per the manufactures recommendation. Do not over apply fertilizer.

Application rate for the Menards Premium fertilizer is 3.4Lbs per 1,000 sq ft. Always calibrate spreader prior to use. Variations in physical characteristics of material applied, walking speed, condition of spreader, and surface roughness may require different spreader settings. Do not over apply fertilizer. Never apply fertilizer by hand. It must be spread evenly over the application area at the recommended rate. Settings listed are approximate settings only. Your setting may vary.
